ARTIST STATEMENT

LIGHT PENETRATES DARKNESS

The concept is an elementary form of thought, a general idea of existence, the Light.

The title of the collections says a lot.

Technique or style direction? Free to realize the concept by existing or not yet existing means.

In the struggle, the preoccupations with the truth, I discover what a significant, irreplaceable role of mental philosophy has light and darkness.

I use fluorescent colors, mental landscapes, transformed, abstracted.

The installation of the works has two or three visualization phases: in light, in black light, in darkness.

The avataric light emitted, the perception of the world of imaginative horizons can stimulate us to ask ourselves: What is light?

.now.
